

FOR IMMEDIATE RELEASE

Primacare™ Collection

The Primacare collection of lounge, dining, guest and patient room seating is now available! The back seat curvature and built in lumbar support provides correct ergonomic seat posture. Replaceable seat covers and replaceable and/or removable seat cushions allow for easy cleaning and germ removal while the cushions' waterfall design eliminates leg discomfort and enhances circulation. Primacare features BIO-Foam which originates from a rapidly renewable resource, Soybean based polyurethane. These cushions provide superior product performance while supporting the agricultural community. Seat and back cushions contain in excess of 20% renewable Soybean Polyols, reducing the usage of crude oil based materials by more than 10%. In addition, no adhesives are used on the upholstery material making this product more readily adaptable to recycling the textile. Primacare is available in a wide variety of textiles. Wood feet and frames are available in an array of finishes. The collection includes a recliner, single and dual sleepers, patient room chairs, guest chairs and multi-seat units, including bariatric versions to suit many functions through healthcare facilities. The entire collection has a 350lb seat capacity.

Since established in 1985, our GLOBALcare division has successfully grown to meet the demands of our aging population. Today, GLOBALcare manufactures products specifically designed to promote correct body positioning and alignment for an enhanced level of wellness, while meeting the quality standards and demands of today's hospitals, long-term care facilities, assisted living environments, clinics and more. We're always listening to what people in the healthcare industry have to say, and we're continually responding to their concerns. GLOBALcare rises above the competition by offering strong consulting resources, a successful problem solving process, superior R.O.I. and comprehensive value added programs for products & service.

Lounge seating shown in Momentum Tease, Vanilla and Charcoal Java (CJM) finish.

FOR IMMEDIATE RELEASE

AUBRA™ Collection

The new Aubra collection offers a durable yet comfortable solution for the most demanding environments. Cushions are constructed of high density Ultracell foam. The tubular all-steel frame can be weighted and fitted with tamper-proof fasteners for increased security in mental health or correctional facilities. The collection includes one, two and three seat models offered in high and low back models. Cleanout space is provided between the seat and back cushions for easy cleaning. The frame, which features wallsaver legs, is available in three finishes. Aubra is available in a variety of textiles. With a versatile offering that includes coordinating tables and benches, Aubra is sure to make a beautiful addition to any setting. Standard models support up to 350 pounds and bariatric models support up to 750 pounds.
