

Healthcare Furniture Manufacturer GLOBALcare Proudly Announces GREENGUARD Certification for NEW Award Winning Sonoma Collection

TORONTO, ON, July 2007... Healthcare furniture manufacturer GLOBALcare proudly announces that their NEW award winning Sonoma Collection is GREENGUARD Certification. Sonoma was developed in response to the needs of care givers, and the changing expectations of people in care, to reflect current methods of delivery in addition to the changing expectations of people in the care industry.

Built using proprietary manufacturing technology that has been field tested for ten years, Sonoma provides unparalleled durability, flexibility and enhanced utility; with attention to detail that render a friendly and nurturing environment.

Specifiers will find the Sonoma Collection modular in size to minimize the footprint and maximize available room space. All furnishings are elevated off the floor to make housekeeping easier and to improve infection control. A range of finish options, comfortable handles and four different fascia profiles are available to compliment the transitional styling and render a friendly and nurturing environment. All of these features come together in the Sonoma Collection to reduce the overall cost of ownership and provide years of service.
