*The Sonoma Collection is built using proprietary manufacturing technology that has been field tested for ten years, providing unparalleled durability.*

The Sonoma Collection was developed in conjunction with leading healthcare professionals, designers and end-users to reflect current methods of delivery and the changing expectations of people in care. Sonoma Bedside Tables support both the caregiver and the individual with essential safety features, improved housekeeping, enhanced utility and unparalleled durability. A range of models offers different storage configurations and formats to suit both long-term and acute care applications.

Specifiers will find the Sonoma Collection is modular to minimize the footprint and maximize the available space in the room. All furnishings are elevated off the floor to make housekeeping easier and to improve infection control. A range of finish options, comfortable handles and four different fascia profiles are available to compliment the transitional styling and render a friendly and nurturing environment. All of these features come together in the Sonoma Collection to reduce the overall cost of ownership and provide years of service.

## Features and Benefits

### Tops

The top of each cabinet is constructed of high pressure laminate with a color matched 3mm polymer edge providing a durable, stain resistant and easy to clean surface.

### Drawer Organizer (Optional)

A removable drawer insert is available which can be located in one or more of the drawers. The drawer insert includes a small item organizer that can travel left to right for easy access from either side of the bed. The drawer liner can be easily removed by housekeeping staff for cleaning.

**GCLBT04**

shown in Avant Honey.

### Top Fascia

The top fascia is available in four attractive transitional styles and acts as a guard to prevent small objects from rolling off the back of the cabinet and out of reach. A lower fascia at the bottom of the cabinet is provided in a matching profile.

### Drawers

Cabinet drawer interiors are polymer wrapped for stain and moisture resistance. Drawer suspensions offer an 80 percent extension and allow for the drawers to be removed for cleaning or transfer by housekeeping staff.

### Legs

The legs are constructed of heavy duty aluminum extrusions and provide superior structural integrity due to the continuous attachment along the full length of the cabinet's frame. The legs are finished in color coordinated and environmentally friendly powder coated epoxy. Custom colors are available on a project basis, consult your GlobalCare Representative for more information.

### Locks

A lock is available for the top drawer of all bedside cabinets. A key alike option is available, in addition to a master key for facility administration.

### Handles

Five handle options are available in coordinating finishes. All handles deliver minimal interference, gentle contours and generous hand clearance to accommodate people with reduced vision or limited motility. Custom handle options are also available on a project basis, consult your GlobalCare Representative for more information.

### Glides

Glides on the front legs are height adjustable to ensure that the top surface can be levelled or slightly angled back towards the rear fascia to reduce the potential of small objects rolling off the top and out of reach.

shown in Shaker Cherry.

### Hanging Accessories (Optional)

The Hanging Accessories can be located on either side of the bedside cabinet and provide additional storage and quick access to magazines, facial tissue, hanging bags and other personal items. The Hanging Accessories are finished in a durable, powder coated epoxy finish that matches the legs and can be easily removed for cleaning.

### Shelves

Cabinets with doors offer an adjustable storage shelf that is removable for cleaning.

### Casters (Optional)

Commercial quality 2.5 inch locking twin-wheel casters facilitate transfer and ease of movement. Fully castered configurations on all four legs are also available on special request.
